Metodické pokyny:

Studenti se postupně seznamují s jednotlivými částmi nemocnice tím způsobem, že začínají od znalostí, které o tématu již mají a postupně informace dále nabalují za pomoci práce s autentickým materiálem, plánkem nemocnice v Canterbury. Téma je procvičeno pomocí mnoha různorodých aktivit (přiřazování k obrázkům, třídění termínů podle jejich významu a lexikálních vlastností jednotlivých slov atp.). Jednotlivé aktivity lze použít také odděleně např. v rámci opakování. Na tento pracovní list přímo navazuje pracovní list č. 15, popis cesty. Aktivita č. 8 se dá využít i dalšími způsoby, např. formou pexesa, binga atp. Doporučujeme obrázky zalaminovat a používat opakovaně během hodin opakování atp. Obrázky lze také např. losovat a použít při nácviku popisu cesty, kdy student popíše cestu k vylosovanému výrazu v rámci dané nemocnice.
